

CNAM

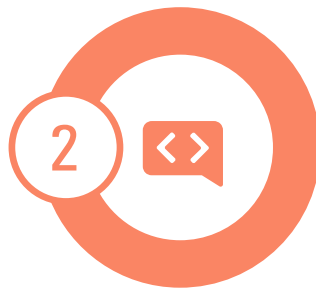

Reliable And Fast Access To Accurate Caller ID Data

SIMPLE AND SECURE

Safe

Anyone can send whatever they want in the Caller ID name field of a call, but can you really trust it? Telemarketers and scammers consistently try to mask this data. With thinQ CNAM, you can have the confidence that you're getting the most accurate Caller ID information.

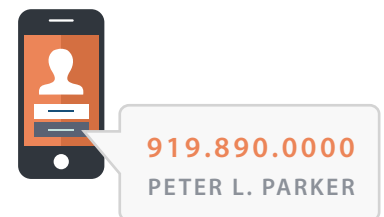

Secure

Our simple yet powerful RESTful API allows developers to quickly and easily integrate Caller ID data into their applications or phone systems. Simply pass us the phone number via our REST API and we will return the accurate Caller ID data in the format of your choice

Accurate

With thinQ CNAM, you can have the confidence that you're getting the most accurate Caller ID information, regardless of what the caller populates the name field with. Features include TXT, JSON, XML formatting on API reply as well as RESTful API Interface.
