thinQ

Least Cost Routing | LCR

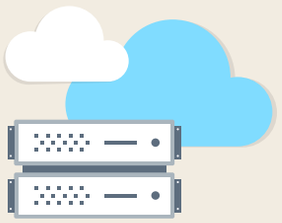
Save Up to 70% With The Industry's First Cloud-based, Fully Customizable, SIP LCR Solution

CLOUD BASED SOLUTION

CUSTOMIZE

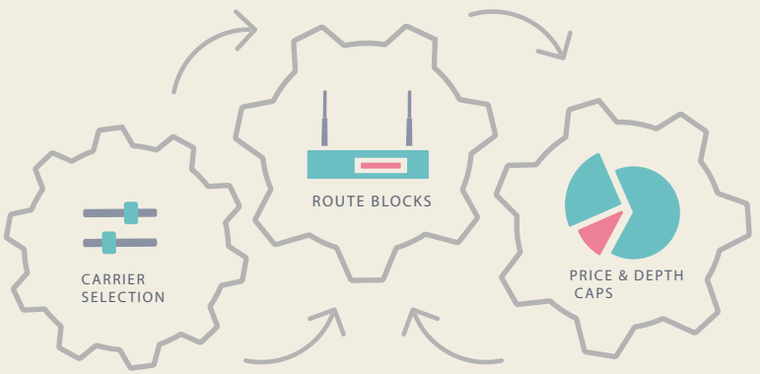
thinQ LCR puts you in complete control of routing your traffic. With more than 40 carrier interconnects already integrated into the system, it is completely turnkey. Simply select the carriers you want to use, define fraud protection controls, and authorize your IP addresses, and you're up and running! thinQ LCR is designed to be customized based on your specific needs rather than a one size fits all solution.

ROUTE



Once thinQ LCR is customized for your traffic, simply point your switch(es) to thinQ LCR and it does the rest! With integrated LRN dipping, you will have the confidence that your calls are being routed accurately based on the network the destination number belongs to. thinQ LCR was purpose built to give you the peace of mind that your traffic is being handled correctly and per YOUR specifications.

ANALYZE

We know you have smart people. So why not empower them to identify and resolve problems quickly?! thinQ LCR's integrated real-time CDR monitoring and SIP Tracing tools allow you to review and isolate problems instantly! Simply search for the criteria you're interested in, select the call, then view the SIP Trace. The time consuming, back and forth game of swapping traces and examples with carriers is over!


COMPLETE CONTROL
