

# Better Voice & Messaging

Route your communications over 40+ carriers, eliminate outages, and save.

1,200+ companies across every industry trust thinQ.

**Enterprise:** No matter what your voice or messaging needs are, thinQ improves performance, adds flexibility, saves you time, and lowers your costs—up to 70% on every call

**Contact Centers:** Enhance call quality and automate savings with our least cost routing technology, unlock multiple carriers, eliminate outages

**App Developers:** Improve mobile messaging and embed voice calls with multiple implementation methods, including APIs

**Marketing:** Power call tracking and unlock campaign analytics with our multi-carrier solution

**Telcos:** Improve your inbound/outbound rates with access to the industry's best carriers, real-time CDR and SIP tracing tools, plus wholesale long-distance and wireless rates

Discover how flexible and less expensive your communications can be in the cloud.

 **Local & Toll-Free Voice:** Purchase, port, and provision your local and toll-free phone numbers

 **Least Cost Routing (LCR):** Full control over 40+ high-quality carriers in a flexible LCR platform, with disaster recovery and savings of up to 70% on every call

 **Messaging:** Engage instantly through mobile by adding SMS/MMS to your applications or local & toll-free numbers

 **Voice API Integrations:** Scale Twilio, Nexmo, Plivo, and SignalWire with multiple carriers and save

 **Database Solutions:** Use the cloud to implement superior Caller Name (CNAM) and Location Routing Number (LRN) lookup solutions

## Meet the thinQ platform.

We've spent 10 years perfecting the most scalable, customizable, and intuitive cloud communications (CPaaS) platform in the industry.

Ready to *think* bigger?

You deserve quality, full control, and savings on your calls and messaging. Let's create a custom-tailored solution to fit your business.

# Communications Professional Bill of Rights

**We believe there's a better way to communicate. You deserve:**

## Instant activation

Automated local & toll-free number ordering, activation & porting

## Better call quality

Fully redundant voice solution that delivers quality customer conversations with high fidelity

## Multiple carriers

Leverage 40+ high-quality carriers with full routing control at your fingertips

## Automatic savings

Find the least cost route for every call & automate savings to lower your costs

## Reduced downtime

Unreliable service is a thing of the past, don't go down even if your carriers do

## Text messaging made easy

Text-enable your app or phone numbers in seconds to meet any SMS/MMS need

## 5 star support

Friendly, expert thinQers are here to help with any issue, *fast*

## Cloud technology that keeps you ahead

Our next-generation platform and APIs scale with you to meet any need

"I'm saving 50% per call in voice costs. The thinQ plug-in gave me a quick and direct way of taking what I already built in Twilio to create carrier-grade pricing and the scaling options I needed."

*CEO & Founder, Telemarketing Software Platform*
