How Morrisette Paper Company eliminated their carrier pain points and saves 80% with thinQ

“As we scaled up we knew we had to offer better pricing to our clients and lower our costs. thinQ's competitive pricing has worked out very well.”

RICHARD NOLAN
Co-Founder, TrackDrive

“No other toll-free solution offers RespOrg-like flexibility and access to all 5 carriers in the cloud. With thinQ we have full control of our communications and the most robust disaster mitigation available. We love it.”

Sr. Carrier Specialist
Airline Spokesperson

“ThinQ is one of the best kept secrets in enterprise telecom. You have an amazing product that checks all the boxes and solves our carrier pain points.”

JAMES CASS
IT Director, Morrisette Paper Company

Outbound > Create Routing Profile > Location

The screenshot shows the 'Create Outbound Routing Profile' page in the 'thing' interface. The page is divided into a left sidebar and a main content area. The sidebar contains a user profile for 'aconstantino', an 'Inbound Balance' of '\$46.34', and a list of 'PRODUCTS' including CNAM, LRN, SMS, Inbound, and Outbound. The 'Outbound' section is expanded, showing 'Routing Profiles', 'Trunks', 'Call Detail Records', and 'Route Blocks'. The main content area has a breadcrumb trail 'Dashboard / Outbound / Routing Profiles' and a title 'Create Outbound Routing Profile'. Below the title is a progress bar with four steps: 'Location' (selected), 'Routing', 'Settings', and 'Carriers'. The 'Location' step is highlighted with a globe icon. Below the progress bar, the text 'Select the area where you would like to route your calls:' is displayed. Three options are shown in boxes: 'North America', 'International', and 'Global'. A blue arrow points to the 'North America' box. A 'Next' button is located at the bottom left of the main content area.

Outbound > Create Routing Profile > Confirmation

The screenshot shows the 'thinq' dashboard interface. The top navigation bar is blue with the 'thinq' logo on the left and three utility icons (expand, share, user) on the right. A breadcrumb trail reads 'Dashboard > Outbound > Routing Profiles'. The left sidebar is dark grey and contains a user profile for 'aconstantino' with a balance of '\$46.34' and a notification for 'Unconfigured' items. Below this is a 'PRODUCTS' section with icons and labels for 'CNAM', 'LRN', 'SMS', 'Inbound', and 'Outbound' (which is expanded to show 'Routing Profiles', 'Trunks', 'Call Detail Records', and 'Route Blocks'). The main content area is white and titled 'Confirmation'. It features a green checkmark icon and the text 'Your routing profile has been saved.' Below this, a section titled 'What would you like to do next?' contains a list of three options: 'Create a new trunk' (with a plus icon), 'Associate existing trunks with this profile' (with a folder icon), and 'I'm done' (with an 'x' icon).

Outbound > Create Route Block > Block

The screenshot displays the thinQ web application interface. The top navigation bar is blue with the thinQ logo and user profile icons. The left sidebar is dark grey and contains a user profile section with the name 'aconstantino', an 'Inbound Balance' of '\$46.34', and an 'Unconfigured' status. Below this is a 'PRODUCTS' section with icons and labels for CNAM, LRN, SMS, Inbound, and Outbound. The 'Outbound' option is currently selected. The main content area has a breadcrumb trail: 'Dashboard / Outbound / Route Blocks'. The primary heading is 'Create Outbound Route Block'. Below this heading is a horizontal tab bar with three tabs: 'Block' (selected, indicated by a blue circle with a diagonal line), 'Settings' (with a gear icon), and 'Associate' (with a link icon). The 'Block' tab contains the instruction 'Select what you would like to block:' followed by a grid of six selectable options: 'NPA/NXX', 'NPA', 'LATA', 'Rate Center', 'State', and 'LATA/OCN'. The 'NPA/NXX' option is highlighted with a blue border. A blue 'Next' button is located at the bottom left of the selection grid.
